

# NORTHERN CALIFORNIA SEWER LATERAL REQUIREMENTS

## WHAT IS A SEWER LATERAL?

*Simply put, a private sewer lateral (sewer lateral) is a pipe that connects the plumbing system of a building or residence to the public sewer (sewer main) typically located in the street, alley, or easement. Sewer laterals are privately owned and are, therefore, required to be maintained by the property owner. Maintenance of the sewer main is generally the responsibility of the public service department such as "Public Works" or local sanitation district.*

## AVOID DELAYS TO YOUR CLOSING

Numerous California cities have an ordinance in place that requires some form of compliance certification upon the sale of the property. Be sure to identify your local requirements and act swiftly to ensure that your escrow is not delayed by required permits, inspections, or repairs.

**The following cities in Northern California have put in place some form of compliance requirement:**

ALAMEDA  
ALBANY  
BELMONT  
BELVEDERE  
BERKELEY  
BETHEL ISLAND  
BRISBANE

SOUTH SAN FRANCISCO  
TARA HILLS  
TIBURON  
TORMEY  
WATSONVILLE  
*\*Unincorporated*

## IMPORTANT NOTES REGARDING YOUR CLOSING:

Please be sure to keep your escrow team informed regarding any applicable sewer lateral requirements and certification progress to ensure your successful closing timeline. Regulations continue to change and cities continue to be added to the list. Contact your local public works department or sanitation district for current, local requirements and complete details.
